## **Public Statement for Dealers and Distributors**

Due to Sig Sauer's recently announced "voluntary upgrade" of the Sig Sauer P320 pistol, announced on August 8, 2017, Apex, out of an abundance of caution, has chosen until further notice to suspend sales of those aftermarket trigger products specifically designed for use in the Sig Sauer P320.

Additionally, for those customers that have purchased an Apex Curved Advanced Trigger, part# 112-022, due to how closely the Curved Advanced Trigger's design reflects that of the current Sig Sauer stock factory trigger, we are asking customers to stop using this trigger and to please contact Apex Customer Service at (623) 322-0200 to return the trigger in exchange for credit towards any one of our Apex products.

Regarding the Apex Flat Advanced Trigger, part# 112-021, and the Apex Flat-Faced Action Enhancement Trigger, part# 112-020, Apex engineers have conducted controlled drop tests at the -30 degree angle with each of these flat triggers and have not had a discharge occur. HOWEVER, because this is too small a sample, and due to the fact that Sig Sauer has indicated that its voluntary upgrade will include more than just the trigger, we advise caution and warn against accepting use of either of these two Apex triggers as solutions to the factory drop safe issue.

As a leading designer, developer and manufacturer of aftermarket products for firearms, Apex strives to produce products that are beneficial to the end user and improve function, while maintaining or enhancing factory safety values. With the latest release of information from Sig Sauer, we have chosen to discontinue the sale of our P320 aftermarket triggers until we can thoroughly test our products with the latest Sig Sauer upgrades for the P320.

Dealers who have stock of unsold Apex triggers for the Sig Sauer P320 (SKU# 112-020, 112-021 or 112-022) may contact Apex's Dealer Sales Manager and request a return for credit of the product they have on hand.

Any product returned to our Dealers and Distributors for refund may be subsequently returned to Apex for a refund in the form of a credit as well.
